What Business Service type did you choose and why?

I choose the service business of a law firm. The reason I chose this category is because it has good concrete examples of what a Law firm website needs to look like. I also like the show Suits so I wanted to imagine what a potential website could look like for Pearson Specter Litt

What mockup tool have you used?

I used Figma, I used ChatGPT to generate pseudo text for anything written. I also used a few open source components from Figma so I didn't have to manually create complex elements like the calendar or map

 Which web sites served as your inspiration?

https://nelliganlaw.ca/

and

https://kellysantini.com/
